

THE SCIENCE BEHIND THE BIOCHARGER

VOLTAGE

The voltage supplied by the BioCharger NG is similar to the lightning discharges on Earth and other naturally occurring cosmic events, such as solar flares. These cosmic phenomena create a voltage field of hundreds of millions of volts within our atmosphere.

FREQUENCIES & HARMONICS

Frequencies & Harmonics found in nature are produced by electric discharge from natural phenomena like lightning strikes within our solar system and beyond. Each lightning discharge generates random frequencies and harmonics, making it nearly impossible to target specific frequencies for particular outcomes directly from nature. The BioCharger NG harnesses electric discharge to deliver customized frequencies and harmonics with unlimited benefits.

LIGHT

Not the light of a light bulb or the Sun - but naturally occurring element gases vibrating at the speed of light including Argon, Xenon, Krypton, Neon, Helium, and Iodine - produce the Light component of the BioCharger NG.

PULSED ELECTROMAGNETIC FIELDS (PEMFs)

For the same reason, individuals practice "Earthing" or "Grounding"; the BioCharger NG allows for an amplified and optimized transfer of electrons in and around your body without ever leaving the house. Unlike most PEMF devices, the BioCharger NG software fine-tunes PEMF therapies to different frequencies throughout each session without needing to be attached to any devices.
